SUMMAR

Full-stack developer and software engineering graduate experienced in building web applications focused on education access and digital experiences. Skilled in React.js, Node.js, Django REST Framework (DRF), Docker, REST APIs, and deployment workflows through software engineering projects and internships. Currently expanding expertise toward AI engineering and intelligent systems.

EDUCATION

African Leadership University – Kigali, Rwanda May 2023 – July 2026
Bachelor of Science in Software Engineering — Graduated
Focused on backend systems, API development, and deployment workflows using React.js, Node.js, Python, and Django REST Framework (DRF).

PROFESSIONAL WORK EXPERIENCE

Software Engineering Intern – Ramaas Software – Hargeisa, Somalia January 2024 – September 2024

- Contributed to backend development for a School Management System using Django REST Framework (DRF), supporting backend services, database operations, and administrative workflows.
- Supported application delivery through API integration, debugging, deployment workflows, and backend system optimization within collaborative software engineering environments.
- Contributed to software planning and technical documentation for a healthcare-related project by preparing Software Requirements Specification (SRS) documentation aligned with stakeholder requirements.

KEY PROJECTS

Alif Monitoring System — Capstone Project 2026
Tech Stack: React.js, Tailwind CSS, Django REST Framework (DRF), MySQL, Docker

- Developed an early warning platform to monitor student attendance and support intervention for reducing school dropout risks.
- Built frontend interfaces and backend services using React.js and Django REST Framework (DRF), integrating attendance tracking workflows and database operations.
- [GitHub](#) | [Live Demo](#)

E-Commerce Platform

Tech Stack: React.js, Tailwind CSS, Django REST Framework (DRF) MySQL, Docker

- Developed an e-commerce platform with product management, user authentication, responsive interfaces, and order workflows.
- Supported deployment workflows using Docker for scalable and consistent application delivery.
- [GitHub](#) | [Live Demo](#)

COMPETENCY MATRIX

- Frontend Development:** React.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Interface Development
- Backend Development:** Python, Django REST Framework (DRF), Flask, Node.js, Express.js, REST APIs
- Databases & Infrastructure:** MySQL, MongoDB, Firebase, Docker, Git, Linux, Deployment Workflows
- Professional Capabilities:** Full-Stack Application Development, API Integration, Technical Documentation, Debugging, Collaborative Software Development
- Emerging Focus:** AI Engineering Fundamentals, Intelligent Systems, Scalable Web Applications

Certifications

- | | | | | |
|------------------------------|--|--|------------------------------|------------------------------------|
| ● Python Programming — Udemy | ● Django REST Framework (DRF) — Coursera | ● GitHub Actions & CI/CD Fundamentals — Coursera | ● Database Design — DataCamp | ● Linux & Git Fundamentals — Udemy |
|------------------------------|--|--|------------------------------|------------------------------------|

LEADERSHIP & COMMUNITY ENGAGEMENT

Volunteer Teacher—Primary School, Somalia

- Supported mathematics learning within under-resourced educational environments.

Technology Mentor — Youth Community

- Mentored students in programming fundamentals and digital learning pathways.

INTERESTS

-
- Software Engineering
 - AI & Emerging Technologies
 - Football
 - Travel

LANGUAGES

-
- Somali - Native
 - English - Fluent
